**Visual2**  
 Sepro

SEPRO launches **VISUAL 2**, its new electronic control for its GENERATION IV robot range. Based on **touch and graphic screen** technology (10" LCD screen), VISUAL 2 combines simplicity and performance.

**Simplicity**

With the **new Simple Pick & Place module**, you create a simple unloading cycle by giving answers to questions and you instantly visualise your choices on the **3D video**.

Thanks to **the integrated joystick**, you can fine tune the movements of your robot in the press with precision and intuition.

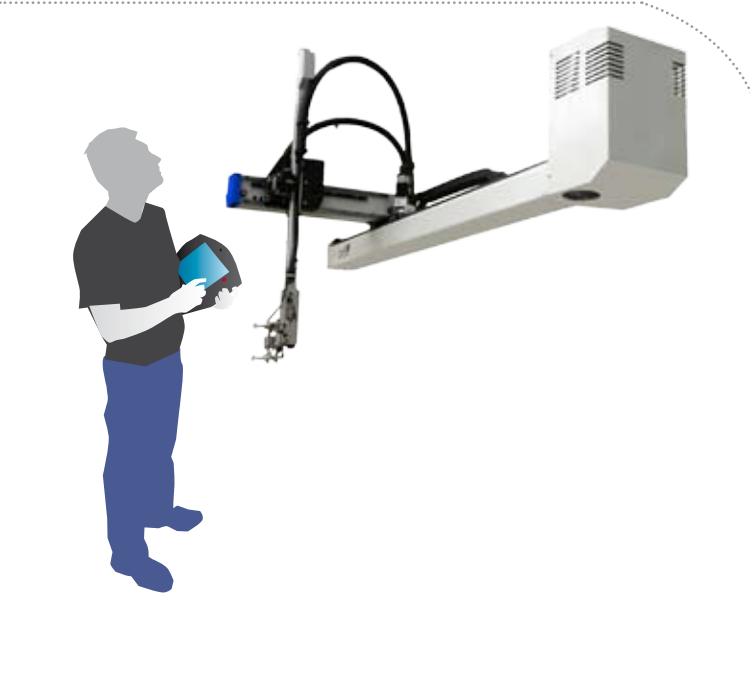

The **user documentation** can be brought up on the screen at any time.

The usb key allows you to save and transfer your programs.

**Performance**

VISUAL 2 is also the perfect tool for **your most advanced applications** such as insert overmoulding, IML, vision, etc. Take up **the Sepro Automation Pack** and make up the most of VISUAL 2 with increased performance.

Come to our booth and go through a demonstration with a Sepro salesman !

**axess 7**

**AXESS, a range of 4 robots dedicated to simple pick and place.**

**Come and discover AXESS 7 !**

SEPRO has just brought out this new model which is perfectly suited to fit **the smaller moulding machines** : it is **compact, rapid** and presents a **beam-mounted cabinet**.

Out of the original range, an **AXESS 11** will equip a 100 T Demag moulding machine on our booth and a similar unit will equip a Ferromatik machine on Ferromatik's booth.

SEPRO displays its economical and efficient range of robots dedicated to simple pick and place applications : AXESS Sepro. All Axess robots are equipped with 3 servomotor driven axes and automate IMMs from 20 to 700 T.

The Axess robots are controlled by our **Axess Touch electronic** control, unrivalled for its **simplicity** and **user-friendliness**. This electronic control enables you to get easy and quick access to the information you need.

**SEPRO AUTOMATION to partner you on your most advanced applications.**

Our SEPRO AUTOMATION Team prides itself on presenting an application with a **5-CNC axis Sepro robot model SR 4060** combined with a 6-CNC axis Sepro-Stäubli robot.

SEPRO AUTOMATION brings all the support that you need on your most complex automation projects all around the world.
